Presented by **Shriya Mohanty**

The Problem

Relocation is Chaotic.

Juggling Tabs

Moving requires managing multiple disconnected platforms simultaneously:

- Housing & Leases
- Utilities Setup
- Gov Documents
- Logistics

Missed Deadlines

Lack of centralized tracking creates chaos:

- No unified timeline
- Critical tasks forgotten
- Costly last-minute rush
- Overwhelming stress

Scattered Insights

Difficulty discovering reliable neighborhood intelligence:

- Untrusted reviews
- Unclear local norms
- Hard to find local services
- Fragmented info

The Solution

Introducing SettleIn

Centralized Command Center

A single platform managing every aspect of your entire relocation process.

Automated Workflows

Smart deadline tracking, automated reminders, and stress-free execution.

AI-Driven Intelligence

Real-time tracking, tailored smart insights, and personalized checklists.

Secure Vault & Budgeting

Centralized document management, lease tracking, and live expense control.

Seamless Transition

Effortlessly shift from "Planning" mode to fully "Settled" in your new home.

Hyper-Local Insights

Neighborhood recommendations, local culture tips, and community discovery.

App Architecture & Core Modules

Everything You Need in One Place

Neighborhood Matcher

AI location discovery & insights

Smart Move Inventory

Organize & track belongings

AI Chat Agent

24/7 personal relocation assistant

Setup Checklist

Tailored step-by-step tasks

Document Tracker

Centralized gov & lease vault

Cost & Budget Planner

Real-time expense monitoring

Aviation Telemetry

Live flight & travel tracking

Feature Deep Dive Dashboard
